One model, two faces

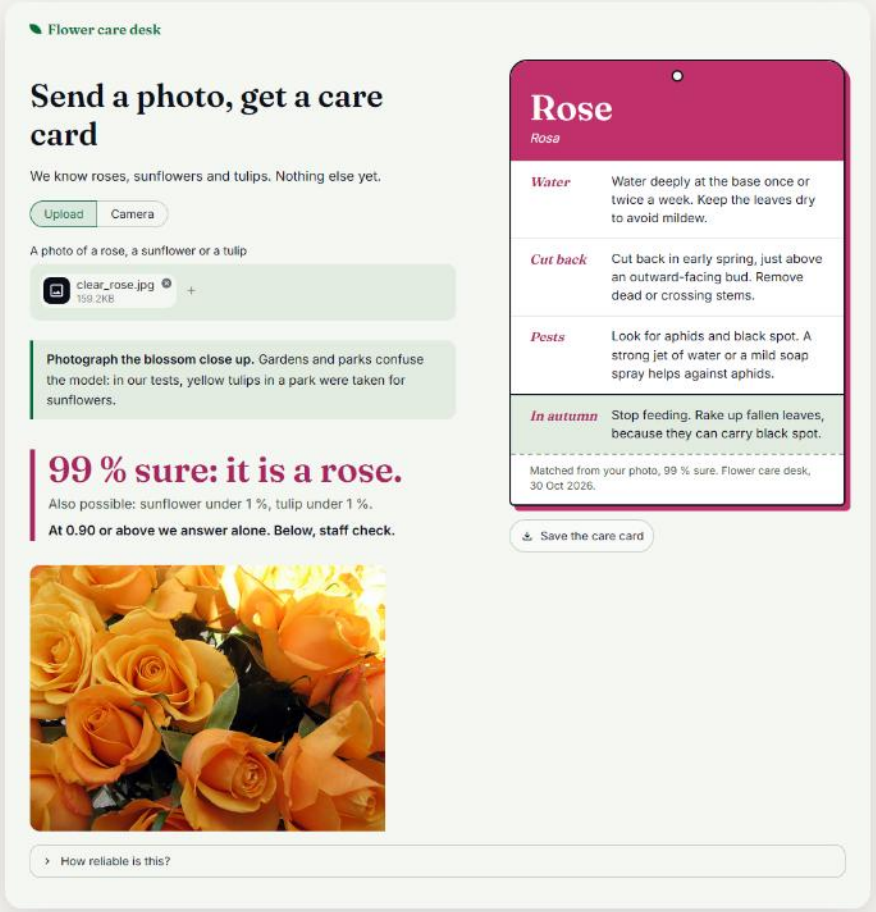

Flower care desk: calm, for the garden centre

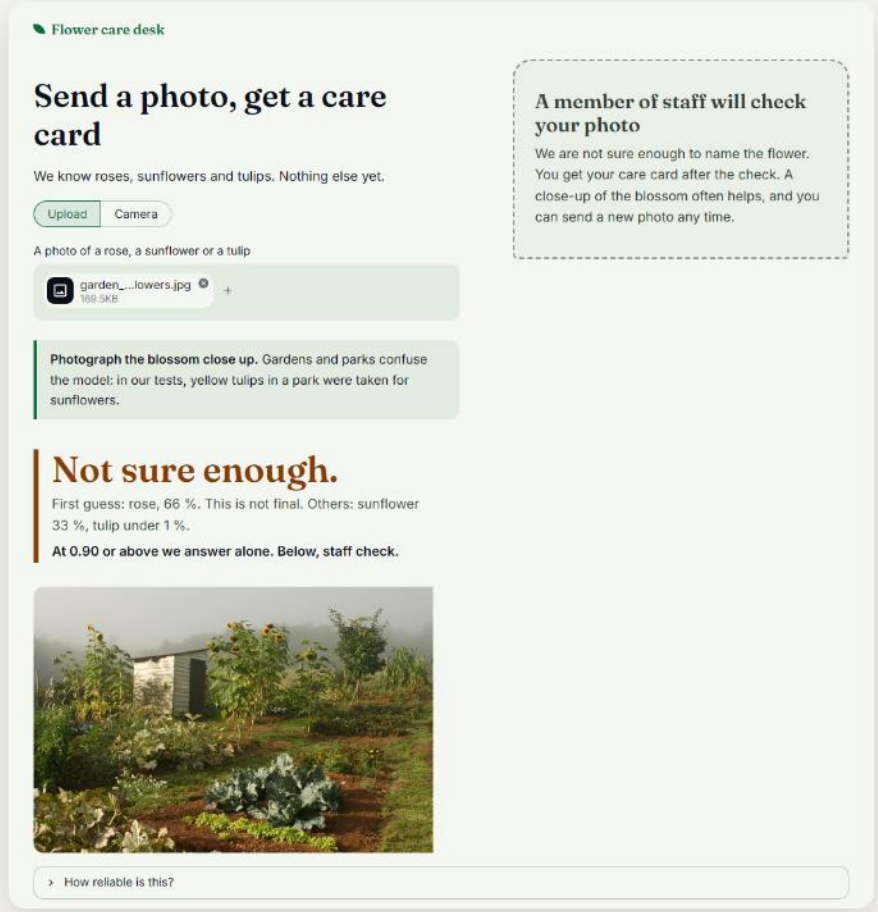

Emotion editions: the page has a mood

The garden-centre version

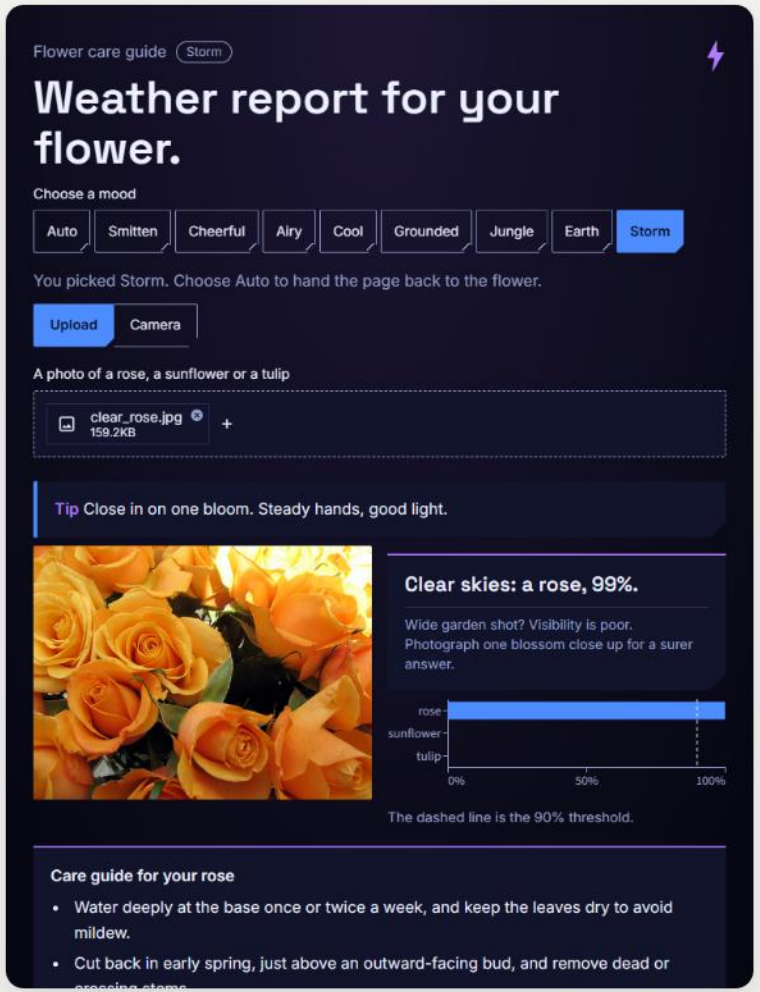

Sure: a care card like a plant label

Below 0.90: a member of staff checks

Same rose, eight moods

Smitten

Cheerful

Airy

Cool

Grounded

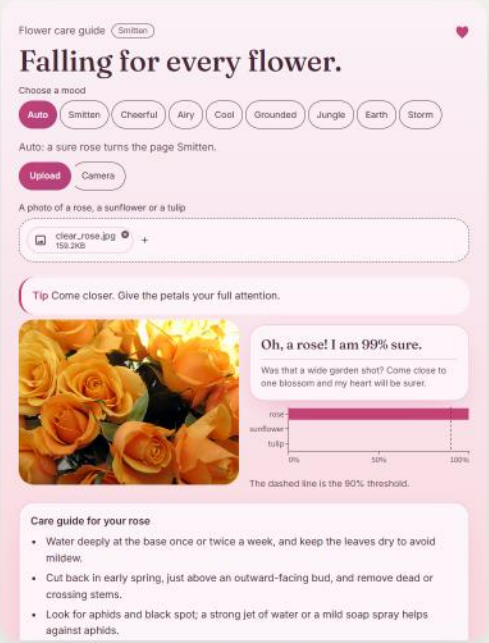

Jungle

Earth

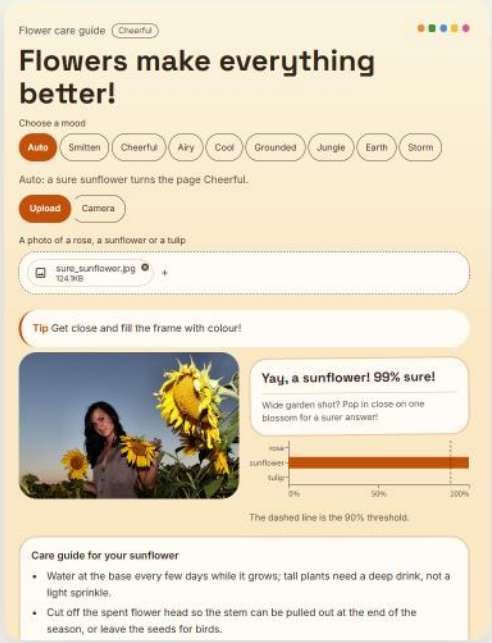

Storm

Colours, type, shapes and voice change together.

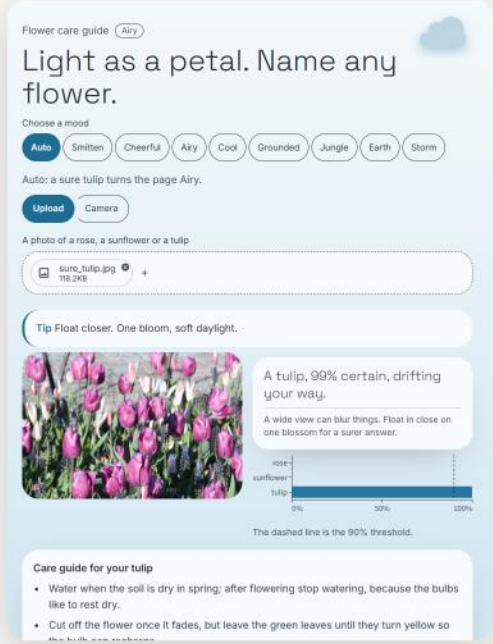

Auto: the page follows the flower

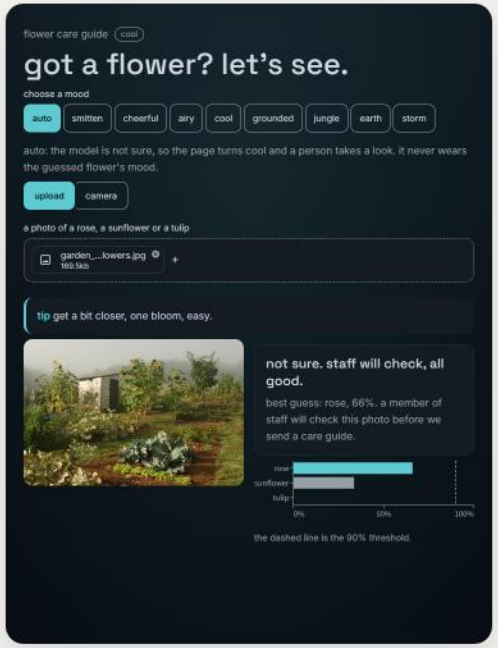

Sure rose: Smitten

Sure sunflower: Cheerful

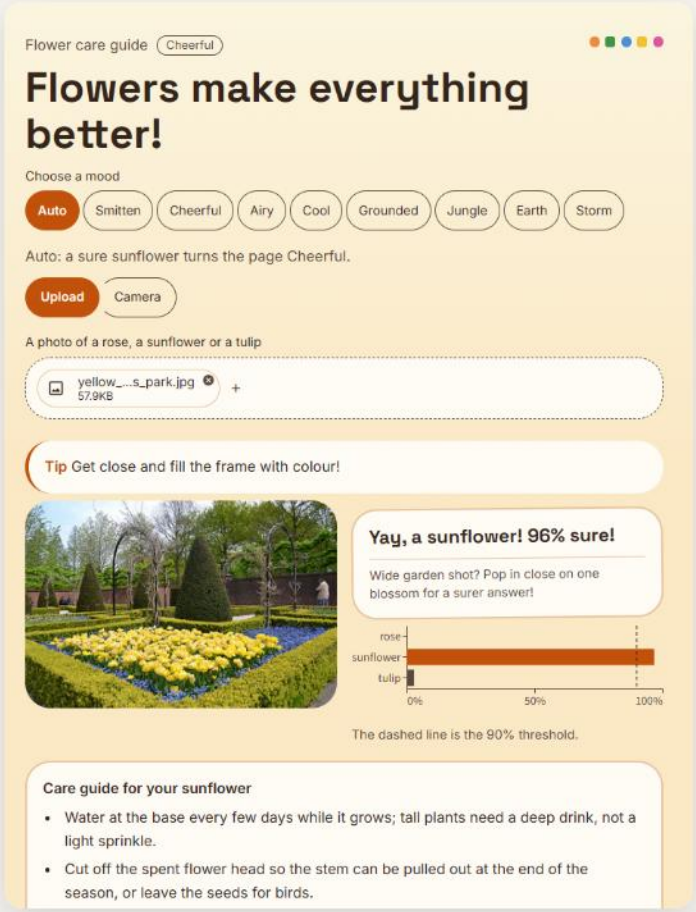

Sure tulip: Airy

Not sure: Cool, staff check

Honest when it is wrong

Yellow tulips in a park

The model says sunflower, 96 % sure. No threshold can catch that

So every sure answer carries one more line: “Wide garden shot? Pop in close on one blossom for a surer answer!”

And the close-up tip is always on screen

Try it with your own flower photos
